## CLEANING FLUID

Water Soluble Concentrate Biodegradable Cleaner

---

### Description

Cleaning Fluid is a biodegradable cleaner, based on environmental friendly, non-toxic raw materials. This cleaner is designed in its concentrated formula and is ideal to remove oil, grease or dirt from all kinds of parts. Depending on the nature or degree of pollution Cleaning Fluid should be used pure or diluted. It can be diluted up to 1 part Cleaning Fluid into 40 or 50 parts of water. Large parts can be cleaned by brushing or spraying them in with Cleaning Fluid, after which the product must soak for a long time. Fast and efficient removal of Motor Cleaner and/or the soaked dirt is possible by immersion into water or the use of a strong jet of water or steam. Soft materials such as copper or aluminum Cleaning Fluid should be rinsed off with plenty of water.

### Available in

Cartons of 24x1 L and 6x5 L.  
Barrels of 30, 60 and 208 L.

### Application

Extremely suitable to remove oil, grease or dirt from all kinds of parts.
